Kimberly Lyons-Mitchell

Medical Librarian
Vail Valley Medical Center - Educational Resource Library
Edwards, CO

2010 STAR Activity:

Grant Approval:

- This year I was challenged with assisting our Radiation Oncologist in submitting a grant to the ASCO (American Society for Clinical Oncology) Foundation for a Komen Improving Cancer Care Grant. The physician and I (the medical librarian) crafted and wrote the grant together (I am also a grant writer in my spare time). The grant is for a program for rural/community radiation oncologists to improve the care that they deliver to breast cancer patients receiving radiation therapy. These rural oncologists will be paired with breast radiation "experts" via a Webex type connection once per month. During their meeting, the expert will advise the rural physician how their treatment plan might be changed to optimize the radiation that their patients receive. Of the 122 letters of intent written, 20 were invited to submit a full grant proposal, we were one of the 20 invited proposals. The committee was to select three recipients from these 20 proposals. We were awarded one of two grants, the other went to Dana Farber, in the amount of \$1.35 million to execute our project over the next three years. We are so pleased and excited to bring such an important project to rural Colorado.
