Cam Gentry

Via Christi Library

Via Christi Hospitals, Wichita, KS

- Teach a class, “Publications Workshop”, along with a research scientist and a teaching physician, to first year Family Practice residents once a year. The aim of the class is to teach the residents how to formulate a clinical research question, then to research the literature for answers and finally to produce an article to be submitted for publication. This year, one of the groups I worked closely with got their article published and I was included as co-author!
Kansas Journal of Medicine Volume 7, Issue 3, 2014, 114-117
Clinical Inquiry---Steroid Use in Prevention of Recurrent Migraine.
Zita Magloire, M.D., Sylvester Domme, M.D., Paul Cleland, M.D., Heather Myers Cooper, D.O., Jennifer Esau, D.O., Camilla Gentry, M.L.S., Ryan Lasota, M.D., Samuel Todd Stephens, M.D., Nicholas Tomsen, M.D.
- A very pleasant story---A pediatrician had emailed me from Eastern Europe while she was on vacation. She asked me to do some research on her topic for a presentation and then send her some articles so she could work on this while on vacation. I did and she sent me an email thanking me for my help and said she would see me when she returned. She came by the Library a couple of weeks later and said she wanted to thank me for my help. She then produced a shopping bag from Antoine & Lili- Paris. She told me she and her sister had gone shopping there and gotten me a scarf—FROM PARIS!! I was so touched. I still have the wonderful shopping bag sitting on a shelf at work and I’m cheered up every time I see it. She is a very good-hearted soul.
- Most important of all, the Library is still open. It is now a one person library, me, BUT still open. I keep striving to help improve healthcare by sharing quality information and research with other healthcare providers. What a great job to have some days!
